*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 – 10, 24 – 31 and 41 – 50, drawn to a container, classified in class 428, subclass 34.1.
  - II. Claims 11 – 23, 32 – 40 and 51 – 56, drawn to a method of forming a container, classified in class 264, subclass 177.2.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, in which the parison is blow molded in the same mold cavity in which it is injected.
3. Because these inventions are distinct for the reasons described above, and have acquired a separate status in the art because of their recognized different classification and subject matter, and because the searches required for the groups are not the same, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Michael Ferrel on October 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1772

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
